Certificate of Completion | “Astana Smart City” Accelerator | Selected among 130 companies Top 10 startups nationwide |

ADIYA KYZYLTAJEVA'S
PROFILE

Adiya became the first student founder to receive a B2G contract

<https://astanahub.com/ru/article/astana-smart-city-accelerator-opredeleny-10-startapov-dlia-zapuska-pilota-v-stolitse>

Chosen among the 10 most promising startups (out of 128 applicant companies) by Astana Hub, the Government of Astana, and Astana Innovations, Autism Spectrum was selected for a city-wide pilot and ₸5 million seed grant. The app enables early autism diagnosis and supports families through digital developmental tracking and AI development. My company was **the only one** that secured partnerships with **3** governmental organisations (clinics), while the average for other top 10 start-ups was **1**.

As part of the accelerator, I received **export-oriented business training** from **industry experts**, adapted the project to address **real urban challenges**, and developed **strategies for scaling to international markets**. The program emphasized **B2G collaboration**, preparing startups for integration into the **city's digital infrastructure** and expanding **technological exports from Kazakhstan**.

According to the **official conclusion signed by the Head of the Astana Department of Public Health**, the two-month pilot in three major clinics proved the project's **high relevance and demand**. The system **significantly reduced doctors' paperwork**, made the **diagnosis and monitoring of autism more efficient**, and enabled families to receive timely feedback and plan further social adaptation steps. The pilot officially **confirmed the app's potential for healthcare digitalization** and **large-scale implementation**. The results were so impactful that I was invited to **Euronews' "East-West Connect" program**, where — out of numerous government-supported projects — only two startups were selected nationwide.

Adiya at EuroNews' episode of "East-West Connect"

(["Kazakhstan's Astana hub fuels tech start-ups and export boom"](#), 2025)

East-West Connect sheds light on key business and economic developments in Kazakhstan and the broader Central Asian region, providing expert analysis of relevant issues while focusing on regional developments.

I was featured on one of their episodes about **Start-ups and Export Boom**. I spoke about my company receiving recognition and support from governmental entities while I was finishing high school.

Winner | National Award “Best Social Project” |
Project: “Autism Spectrum” |
Capital Health Forum, Ministry of Health Support |
Youngest Nominee in Award History

In 2024, Adiya Kyzyltayeva won Kazakhstan’s National Award for “Best Social Project” at the Capital Health Forum, the country’s largest health forum, supported by the Ministry of Health. She created the Autism Spectrum project to enhance early identification and intervention for autistic people. At that time, it was still a school-based scientific project, not yet a formal entity. Adiya’s innovation and dedication made her the youngest nominee and winner in the award’s history. The recognition highlighted her efforts to raise awareness and provide support for autistic people in Kazakhstan.

“Autism Spectrum” - name of the project

Айдасова Анарши Таирұрлы

21-22| 09| 2024

Adiya Kyzyltayeva has delivered two TEDx talks in Astana. In her first talk, she presented the Autism Spectrum project, an app designed to support children and parents by providing early diagnosis tools and systematized information about autism spectrum disorders. Her second talk focused on youth innovation and social entrepreneurship, sharing experiences from the Astana HUB “Astana Smart City” acceleration program and participation in the international Technovation Girls 2023–2024 competition, where her team became semi-finalists and later won the “Best Social Project” award at the Capital Health Forum.

Links to talks:

2. <https://www.ted.com/tedx/events/57108>

Regional Pitch Winner | Semi-Finalist, Technovation Girls 2024 | AI & Applications | Project “Autism Spectrum”

The Autism Spectrum project reached the semi-finals of the Technovation Girls 2024 innovation competition, a prestigious international program encouraging young women to develop AI-driven solutions. Adiya Kyzyltayeveva's team won the regional pitch, impressing the judges with their innovative approach to early autism diagnosis. One of the guests at the event, the official TEDx organizer in Astana, invited Adiya and her teammate to present their project at a TEDx talk, highlighting the project's impact and presentation excellence. The competition attracts highly competitive teams globally, making this semi-finalist achievement especially notable in youth STEM entrepreneurship.

Copyright & Startup Registration | Project “Autism Spectrum” | One of the youngest Astana Hub Residents

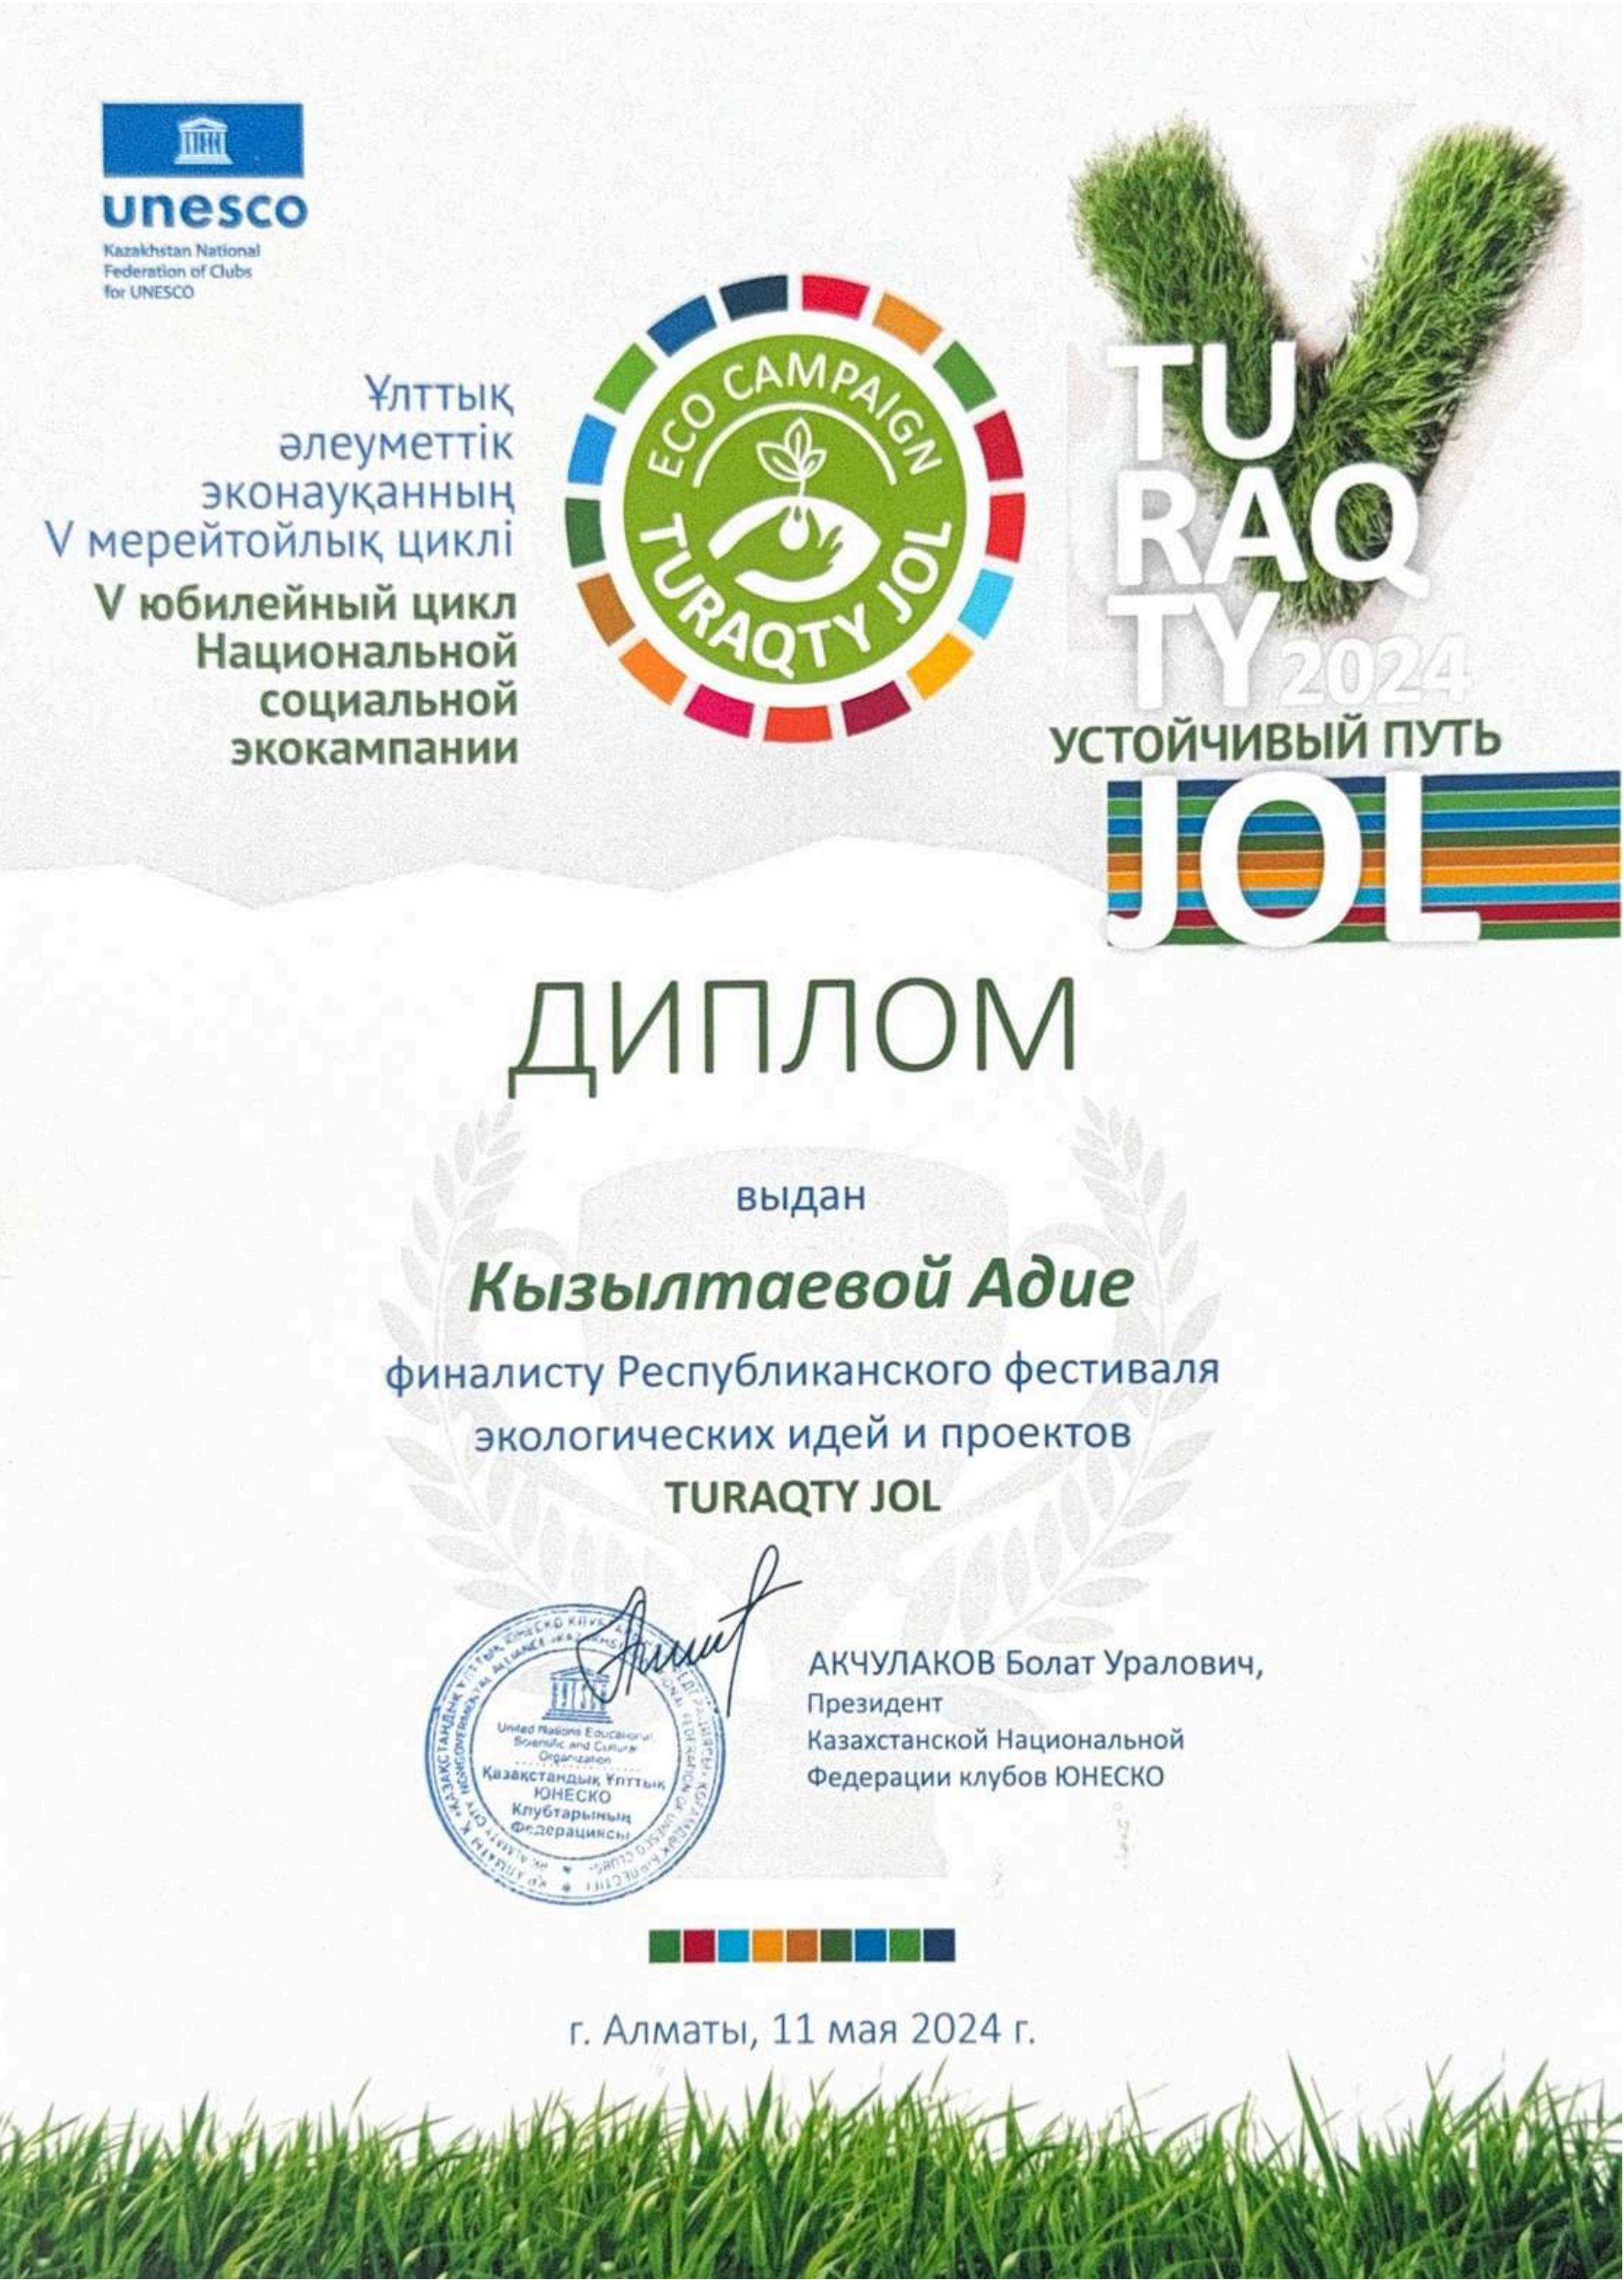

Adiya Kyzyltayeva and her team secured a copyright certificate for the Autism Spectrum project from the QAZPATENT Institute of Intellectual Property, protecting the intellectual property of her early diagnosis and intervention application for autism. Following this, the project was formally registered as an LLP and accepted into the Astana Hub accelerator program, making Adiya one of the youngest residents in the history of the government-backed tech development hub. These steps formalized her project and positioned it for national-level implementation and scaling.

Алдабаева Асият Талғатқызы

3rd Place | International Space Technology Competition | Satbayev University | Munara Project

The Munara project earned 3rd place in the International Space Technology Competition. The project explores prospects for space colonization and anticipates climate-related challenges on Earth, proposing sustainable solutions for future habitats. The competition is internationally recognized for attracting innovative projects from students and teams worldwide.

Winner of T300,000 | NURIS Hardware Challenge 3.0 | IHT Central Asia | High School Team Among University Competitors

In 2023, Adiya Kyzyltayeveva's team won the NURIS Hardware Challenge 3.0, a national innovation competition by IHT Central Asia. Their project, IDA TECH, is a cost-effective, working prototype of a skull fixation system for neurosurgery, developed using advanced 3D printing technologies. The prototype was designed in collaboration with accredited medical specialists from the Hospital of the Medical Center of the Administration of the President of the Republic of Kazakhstan. Remarkably, Adiya and her team were the only high school students competing among university-level participants, highlighting both the technical sophistication and the competitiveness of their achievement

From Intern to Co-founder of Innovative Bioacademy Organised Republican Chemistry Olympiad & Competitions Promoting STEM Engagement Among Youth

Co-Founder

GenomiX BioScience Academy · Self-employed

May 2023 - Present · 2 yrs 6 mos

Astana, Kazakhstan · Hybrid

As an emerging expert in the Business, Science and Education industries, I have demonstrated significant organizational and structural expertise in various roles, including coordinator, project manager, lab assistant, and educator. During summer camps, Bioacademy lessons, and masterclasses, I have successfully engaged with children aged 6 to 15, making steps towards developing in young generation curiosity for biochemical careers. This project involved collaboration with 15 companies and 5 private schools, resulting in features and publications in 6 major media outlets. My contributions have been integral to the development and execution of educational programs, tools and innovative methodics, fostering a dynamic learning environment for future doctors and scientists.

Top 10% | Global BL4S Competition | CERN & DESY | Perovskite Solar Cells Project

The Perovskite Solar Cells project was ranked in the top 10% of entries in the global BL4S competition, an international physics contest for schoolchildren organized by CERN (European Particle Physics Laboratory) and DESY (German Electron Synchrotron). The competition invites teams worldwide to propose experiments to be carried out on particle accelerator beam lines. Adiya and her teammates collaborated with professors from Nazarbayev University to enhance the efficiency and quality of perovskite solar panels, demonstrating a high level of scientific rigor and international competitiveness.

Link: https://beamline-for-schools.web.cern.ch/sites/default/files/BL4S_all-winners_2024_final.pdf

BL4S 2024 shortlist

This year 49 teams were selected to be part of the shortlist. Out of them, two teams will be invited to CERN and one to DESY in September to perform their experiments. All the others will receive special prizes including BL4S T-shirts and a do-it-yourself kit to build their own particle detector.

Silver Medal | INFOMATRIX Asia 2023 | International Science and IT Project Competition

In 2023, Adiya Kyzyltayeva secured 2nd place at INFOMATRIX Asia, one of Asia's most selective international IT project competitions. Held in Astana, the event attracted top student innovators from over 5 countries, including Kazakhstan, Turkmenistan, and Hong Kong. Adiya's project, "Autism Spectrum", is a pioneering application designed for the early identification and intervention of autism spectrum disorder (ASD). At the time, it was a school-based scientific initiative, not yet a formal entity. Following this achievement, Adiya founded Anisa Spectrum LLP, which now collaborates with the Akimat of Astana, state healthcare institutions, and digitalization agencies to implement the project across three major clinics and two divisions. Additionally, the project partners with leading organizations supporting children with special needs. Adiya's recognition at INFOMATRIX Asia underscores her commitment to leveraging technology for social impact and her leadership in advancing ASD awareness and support in Kazakhstan.

Multiple National Awards | Scientific & Innovation Competitions | Project “Autism Spectrum”

The Autism Spectrum project earned multiple national recognitions in 2023–2024. It won 1st place at the National Scientific Exhibition-Competition at NIS PhMd Astana, and secured 2nd place at both the Annual Regional Conference on Global Perspectives and Project Work and the Republican Competition of Innovative Projects “Smart City 2024.” These achievements highlight the project’s innovative approach to early autism diagnosis and intervention, as well as its competitiveness across diverse scientific and technology-focused platforms in Kazakhstan.

Only Kazakh Student | International College of Economics & Finance | HSE Summer Bridge School 2024

Adiya Kyzyltayeva completed the Summer Bridge School at the International College of Economics and Finance, National Research University Higher School of Economics (HSE), in 2024. She was the only student from Kazakhstan in her cohort. The program prepared her for advanced studies in mathematics and economics, covering Mathematics for Economists, Econometrics, Microeconomics, and Macroeconomics, demonstrating readiness for graduate-level coursework and global academic competitiveness.

ICEF SUMMER BRIDGE SCHOOL IN FINANCIAL ECONOMICS

Multiple Best Speaker | Winner National Debate Championships (English League) | Member, Kazakhstan National Pre-Team 2023

Adiya Kyzyltaeva excelled in Kazakhstan's National Debate Championships in the English League, winning over 10 awards during her junior and senior years. She succeeded in several formats: team (3-5 people), Lincoln-Douglas (2 people), and solo competitions. She was named the best speaker at most events she entered. In 2023, she was among the top 10 speakers considered for the national team. However, Kazakhstan did not enter the Global NSDC that year due to post-COVID challenges. These achievements show her leadership, critical thinking, and persuasive skills.
